

Maintenance and Management Plan

June 2025 – June 2035

The City of Petersburg will use funds from the CFPF to complete Phase 2a of the Citywide Drainage Study, which will build on the efforts of the original Citywide Drainage study (Phase 1) and identify specific projects where improvements are needed. This project will have community scale benefits, will provide long term benefits to all residents of Petersburg, as it will allow provide a framework for the City effectively plan and budget to improve the areas of the City most affected by flooding, reducing economic hardship for residents in those areas and ensure broad connectivity across the City for years to come. The City is committed to utilize the PERs to plan for the long-term implementation and subsequent maintenance the identified projects.
